Senior Mobile Developer - HOFr Sports (Tango.io)

April 2020 - Present

Technologies: React Native, ReactJs, Flow Type, Storybooks, Detox, Apollo GraphQL, Xcode, Android Studio, GitHub, GitHub Actions, CI-CD, Jira

Responsible for creating and maintaining the application modules with the best standards, creating reusable code and with their respective unit and user tests.

Implementing the new UI creating a responsive and pixel perfect interface with animations.

Senior Mobile Developer - MilkCrate

March 2019 - February 2020

Technologies: React Native, Redux, Android, Xcode, GitHub, AirTable, Azure.

Responsible for development and maintenance of applications. Create, maintain and refactorize components in React Native. Responsible for documenting requirements for the back end team and updating the base version of the main project and libraries.

Mobile Developer - BillettInc.

October 2018 - March 2019

Technologies: React Native, React.js, Redux, Android, Xcode, GitHub, Crashlytics, InVision, Confluence.

In charge of updating version of native apps to React Native and creating new components and functionalities. I researched the best components to pass the main application core. Created a shared submodule with Redux + API between a mobile app (React Native) and a web app (React.js).

Implementation of a new UI, crafting a pixel perfect interface for all devices. Performed code review and pull request approval. Responsible for managing the App Store and Google Play, as well as bet and production channels.

Mobile Developer - In Out Delivery

January 2018 - October 2018

Technologies: React Native, Xcode, BitBucket.

Developed an app for drink and snack delivery for Heineken in Mexico. I was responsible for searching the best components for functionalities, creation of animations for UI, development of a white level app to connect different clients and did component documentation to be aligned with the web team.

Head of Development - Jet Raccoon Studio

February 2013 - February 2017

In charge of prototyping to support the commercial team. Project management, tech leadership and staff coordination. Ensured compliance with delivery dates and correct operation of developed modules. Responsible for time and resource estimates for the fulfillment of each project.
